

ILFORD

GALERIE

CLASSIC GLOSS & PEARL PAPER IGCGP9/IGCPP9

ILFORD GALERIE CLASSIC PAPER is a premium polymer RC paper designed to provide images with excellent colour stability and an elegant professional finish, from today's range of photo-dedicated desktop inkjet printers.

FEATURES

- Classic gloss / pearl finish
- True feel of a real photograph
- Excellent image stability
- Superb photographic image quality and consistency
- Designed for high speed printers
- Excellent compatibility with all high quality inkjet printers, especially those designed for photo output
- Good archival properties and fade resistance (see Note below)

PRINTER & INK COMPATIBILITY

Compatible with most photo-dedicated and photo-capable desktop printers and the corresponding vendor's inks.

Not compatible with pigment inks.

AVAILABILITY

A4 (210x297mm) / U4 (8.5"x11")	25 sheets, 100 sheets – 250 sheets (USA only)
A3 (297x420mm) / U3 (11"x17")	25 sheets
A3+ (329x483mm) / U3+ (13"x19")	25 sheets

PHYSICAL PROPERTIES (TARGET VALUES)

	GLOSS	PEARL
Weight	240g/m ²	250g/m ²
Opacity	99%	99%
Caliper	230micron	250micron
Tint (Lab)	95.5, 0.5, -4.0	94.5, 1.0, -4.7
Gloss (60°)	50-80% (20°)	14-22% (60°)

NOTE

ILFORD GALERIE CLASSIC PAPER has similar resistance to air pollutants as conventional photographic print media. Compared to the "instant dry" inkjet media it does not suffer from "gas fading" issues under similar conditions, and can also be kept in both light and dark storage without protection from laminates, sleeves or glass. In an unprotected display, indoors and away from direct sunlight, life expectancy of up to 20 years can be expected depending on the ink used.

The life expectancy of all inkjet media is influenced by humidity, light and the ink being used. At higher light levels or humidity, one should expect a shorter life expectancy than at low light level or humidity. Some inkjet printer inks also offer poor stability when compared with others. When storing and handling prints at the extremes of the environmental range (<10% r.h. and >70%), performance and permanence may be reduced.

Specifications subject to change without notice.

ILFORD

GALERIE

SMOOTH GLOSS & PEARL PAPER IGSGP9 / IGSP9

ILFORD GALERIE SMOOTH PAPER is a premium microceramic RC paper designed to provide instant dry images with a real photo look and finish, from today's range of photo-dedicated desktop inkjet printers. ILFORD GALERIE SMOOTH PAPER is available in "Gloss" and "Pearl" finish.

FEATURES

- Smooth gloss/pearl surface
- Instant dry
- Superb photographic image quality and consistency
- Heavyweight look and feel of a real photograph
- Excellent compatibility with all high quality inkjet printers, especially those designed for photo output
- Good archival properties and fade resistance (see Note below)

PRINTER & INK COMPATIBILITY

Compatible with most photo-dedicated and photo-capable desktop printers and the corresponding vendor's inks.

AVAILABILITY

A4 (210x297mm) / U4 (8.5"x11")	25 sheets, 100 sheets – 250 sheets (USA only)
A3 (297x420mm) / U3 (11"x17")	25 sheets
A3+ (329x483mm) / U3+ (13"x19")	25 sheets

PHYSICAL PROPERTIES (TARGET VALUES)

	GLOSS	PEARL
Weight	280g/m ²	280g/m ²
Opacity	99%	99%
Caliper	275 micron	280 micron
Tint (Lab)	94.5, 1.0, -4.7	94.5, 1.0, -4.7
Gloss	22-28% (20°)	14-22% (60°)

NOTES

ILFORD GALERIE SMOOTH PAPER — like all unprotected nanoporous "instant dry" media. — is sensitive to environmental pollutants, an effect often referred to as "gas fading". "Gas fading" occurs with or without the media being exposed to light. Environmental humidity and air circulation play an important role in the "gas fading" issue. In a protected display, laminated or under glass, indoors and away from direct sunlight, life expectancy of up to 10 years can be expected with both the gloss and the pearl papers, depending on the ink used.

To archive this type of media, it should be stored in files and not open to well ventilated environments. In ventilated environments even in the dark "gas fading" can still occur.

The life expectancy of all inkjet media is influenced by humidity, light and the ink being used. At higher light levels or humidity, one should expect a shorter life expectancy than at low light level or humidity. Some inkjet printer inks also offer poor stability when compared with others. When storing and handling prints at the extremes of the environmental range (<10% r.h. and >70%), performance and permanence may be reduced.

ILFORD

GALERIE

SMOOTH FINE ART PAPER IGMFA

ILFORD GALERIE SMOOTH FINE ART PAPER is a 100% rag, acid free textured matt paper designed for high quality digital fine art reproduction and print applications on today's range of photo-dedicated desktop inkjet printers.

FEATURES

- Textured matt surface
- Excellent for producing high quality fine art photography
- Excellent image stability
- Fast drying
- Good archival properties and fade resistance (see Note below)

PRINTER & INK COMPATIBILITY

Compatible with most photo-dedicated and photo-capable dye and pigment desktop inkjet printers and the corresponding vendor's inks.

AVAILABILITY

A4 (210x297mm)	10 sheets
A3 (297x420mm)	10 sheets
A3+ (329x483mm)	10 sheets

PHYSICAL PROPERTIES (TARGET VALUES)

Weight	190g/m ²
Opacity	> 96%
Caliper	400micron
Whiteness	96%
Acidity (pH)	7.8

HANDLING & STORAGE

Finished prints should be interleaved and stored carefully to prevent scratching. Fine art ink and print surfaces are more delicate than conventional RC inkjet prints and should be handled with care.

NOTE

The life expectancy of all inkjet media is influenced by humidity, light and the ink being used. At higher light levels or humidity, one should expect a shorter life expectancy than at low light level or humidity. Some inkjet printer inks also offer poor stability when compared with others.

When storing and handling prints at the extremes of the environmental range (<10% r.h. and >70%), performance and permanence may be reduced.

Print lifetimes will be significantly longer when using pigmented inks rather than dye based inks.

Specifications subject to change without notice.

ILFORD

GALERIE

SMOOTH HIGH GLOSS MEDIA IGSWF7

GALERIE SMOOTH HIGH GLOSS MEDIA is a premium nanoporous media designed to provide images with a real photo look and finish, and which are dry to touch directly after printing from today's range of photo-dedicated desktop inkjet printers.

FEATURES

- Polyester film base
- High gloss surface
- Instant dry
- Superb photographic image quality and consistency
- Ideal for high end photography and commercial presentations

PRINTER & INK COMPATIBILITY

Compatible with all good quality pigment and dye desktop inkjet printers and the corresponding vendor's inks.

Note: pigmented inks need time to "set" before handling and may lead to some loss of gloss in printed areas.

AVAILABILITY

A4 (210x297mm)	25 sheets
U4 (8.5"x11")	25 sheets

PHYSICAL PROPERTIES (TARGET VALUES)

Weight	235 g/m ²
Opacity	> 98 %
Caliper	175 micron
Tint (Lab)	97.0, 1.2, -5.5
Gloss (20°)	40%

NOTE

GALERIE SMOOTH HIGH GLOSS MEDIA — like all unprotected nanoporous "instant dry" media — is sensitive to environmental pollutants, an effect often referred to as "gas fading". "Gas fading" occurs with or without the media being exposed to light. Environmental humidity and air circulation play an important role in the "gas fading" issue. In a protected display, laminated or under glass, indoors and away from direct sunlight, life expectancy of up to 10 years can be expected, depending on the ink used.

To archive this type of media, it should be stored in files and not open to well ventilated environments. In ventilated environments, even in the dark, "gas fading" can still occur.

The life expectancy of all inkjet media is influenced by humidity, light and the ink being used. At higher light levels or humidity, one should expect a shorter life expectancy than at low light level or humidity. Some inkjet printer inks also offer poor stability when compared with others. When storing and handling prints at the extremes of the environmental range (<10% r.h. and >70%), performance and permanence may be reduced.

Specifications subject to change without notice.

ILFORD

GALERIE

SMOOTH HEAVYWEIGHT MATTE PAPER IGSHWP

GALERIE SMOOTH HEAVYWEIGHT MATTE PAPER is a double-sided smooth matte paper designed for printing high quality documents on today's range of photo-dedicated dye and pigment desktop printers.

FEATURES

- True double-sided inkjet media
- Ideal for fine art, high end brochures and presentations
- Smooth matte surface
- Fast drying

PRINTER & INK COMPATIBILITY

Compatible with all good quality pigment and dye desktop inkjet printers and the corresponding vendor's inks.

AVAILABILITY

A4 (210x297mm)	50 sheets
U4 (8.5"x11")	50 sheets

PHYSICAL PROPERTIES (TARGET VALUES)

Weight	200g/m ²
Opacity	> 90%
Caliper	245 micron
Tint (Lab), front & reverse	94.0, 3.5, 10.0
Brightness, front & reverse	> 95% (ISO 2470)

HANDLING

When loading media in the printer, be sure to flex and fan the paper to reduce the risk of misfeeding; in case of difficulty, single sheet feeding is recommended.

When printing double-sided, additional time may be required between printing the two sides to allow the media to absorb the ink and to dry.

Some printers may be equipped with automatic two side printing adapters: whilst the media has been successfully tested with these devices, depending on the printer and images it may be preferable to manually reintroduce the paper to print the second side.

NOTE

The life expectancy of all inkjet media is influenced by humidity, light and the ink being used. At higher light levels or humidity, one should expect a shorter life expectancy than at low light level or humidity. Some inkjet printer inks also offer poor stability when compared with others.

When storing and handling prints at the extremes of the environmental range (<10% r.h. and >70%), performance and permanence may be reduced.

Specifications subject to change without notice.
